GSMNow! – proved telephony SDK with .NET support in every Gotive H41 device

Gotive supports GSMNow!, a toolkit for simple development of mobile telephony solutions

Sygyic, a producer of communication and navigation software tools, and Gotive, a producer of rugged communicators, have signed a contract to provide Gotive H41 devices with GSM development toolkit. Developers can now implement enhanced GSM functionality into their applications faster and easier at zero additional costs.

“GSMNow! is a special value added to our product. It dramatically increases our customers’ ROI on GSM-based solutions. GSMNow! makes development of those solutions a straightforward process.” says Kamil Jadron, Gotive Sales and Marketing Director.

GSMNow! is now shipped with every Gotive H41 device on CD. Existing Gotive customers can download and install GSMNow! development toolkit at <http://www.sygyic.com/downloads/gotive>

INSIDER OPINION

Viktor Bielko,
Gotive Technical Support

“Developers may have problems with GSM native AT-commands. They spend too much time finding and eliminating bugs arising from actions like sending SMS messages or initiating and receiving calls. **GSMNow! solves all those problems and makes GSM programming easy and comfortable.**”

About Sygyic

Sygyic develops and sells communication and navigation software for new age of mobile devices that connect people easily and efficiently wherever, whenever and however they wish.

About Gotive

Gotive Ltd. develops, produces, and sells highly innovative communicators for vertical markets. Gotive's communicators are designed for use in any application in which mobile users need to collect, process and communicate information at the point of activity: remote logistics, transportation, field services, utilities, retail on the move, public safety, forestry, military, ... in practically any mobile enterprise solution.

Gotive's communicators are powerful devices that integrate various components needed for mobile enterprise solutions. The desired combination handheld computer, mobile phone, GPS, bar code scanner, smart card and magnetic card readers, printer, fingerprint identification unit, digital camera, etc. can be built into one mobile device. Added ergonomics and ruggedisation complement the unique features of Gotive's devices.
