

Gotive develops, produces and sells highly innovative **communicators for mobile enterprise**. Gotive communicators are technology-packed yet easy-to-operate rugged handheld devices that integrate various communication, data capture and navigation features needed for mobile enterprise solutions. They combine handheld computer, GSM/GPRS, WLAN, Bluetooth, GPS, barcode scanner, SmartCard reader/writer, fingerprint identification unit, etc., which can be **built into one mobile device**.

Featuring an extensive range of options, ergonomic design and outstanding system performance, Gotive communicators are ideal tools for the mobile workers who need to **collect, process and communicate information** at the point of activity. Gotive communicators therefore represent the perfect solution for practically any mobile enterprise, e.g. remote logistics, transportation, courier services, field services and utilities, field sales, retail, warehousing and distribution, manufacturing, public safety and administration, healthcare, hospitality and leisure, etc.

With the **high-quality manufacturing, state-of-the-art design and possibility of product customization**

Gotive supplies its customers with excellent and 'fit for purpose' products.
