

H42: Case Study

Logistics & transportation

Freight forwarding

© 2001 - 2007 www.gotive.com

End user:

Kuehne + Nagel
(www.kn-portal.com)

Configuration of Gotive systems deployed:

H41 I.M.G.B, H41 DSV A

Description of the project:

Designed primarily to improve data flow between the company and its subcontractors, Gotive H41 device will provide financial benefits for the company, its suppliers and customers. It is able to retain an on-line connection with the logistics management database and allows the user to transmit, update and maintain information immediately into the main system, enabling the logistics manager is to keep close control of all loads.

The solution has been awarded the prestigious IFW Freighting Industry 2003 Awards (www.ifw-net.com) in the category Innovation. The Award Ceremony was held at the Honourable Artillery Co in the City of London, United Kingdom, on June 10, 2003. "Kuehne & Nagel's Gotive H41 system - a hand-held computer, mobile phone, navigation device and barcode reader was a clear winner, providing a genuinely innovative solution to the challenge of first/last mile visibility."

Country/geographical area: **United Kingdom**
