

# H42: Case Study **NEW!**

## Logistics & transportation

Waste logistics management

End user:

**Etineo**

Product configuration:

**H41**

### Project Description:

Etineo specialises in traceability and geo-localization using embedded communication systems. Etineo provides powerful and innovative solutions for logistics, healthcare, industry and environment.

Etineo conceived and created the solution “*Etineo Collecte*”, destined for professional workers. “*Etineo Collecte*” works on GOTIVE device and permits to users to:

- improve their service quality: reactivity, intervention planning, updates in real time
- increase their reactivity: transit optimization of the let skips, trucks and materials tracking automation, costs reduction
- provide new services to their customers: Intervention requests, on line follow up to invoicing, tracking, electronic signature, statistics supply
- fit to legislative claims

Country/geographical area: **France**
