© 2001 - 2007 www.gotive.com

End user:

**Guanter Rodriguez**

Configuration of Gotive systems deployed:

**H41.I.W, H41 DS**

Phases of the project:

Start of the project

2005

Functionality:

Guanter Rodriguez Group has been since 1963 specializing in transportation of fresh products.

In the Guanter Rodriguez warehouses, fork-lift trucks used for order processing are equipped with H41 Wifi terminals placed in docking stations connected to a bar code scanner via PS/2 port. By means of technology and adopted system, the containers transporting fresh fruits and vegetables are identified.

System Integrator: IER, specialized in solutions for logistics. Contact : M. Michel NUNES , tél. 05.61.00.64.02, email. mnunes@ier.fr
