

H42: Case Study **NEW!**

Warehousing

Warehouse management

End user:

HAMA

www.hama.com

Configuration of Gotive systems deployed:

Gotive H42.S.W.B, Pistol Grip

Project milestones:

- Start of the project December 2004
- Finalisation of SW June 2005
- Pilots August-September 2005
- Shipments From September 2005 - 2006

Functionality:

The markets and customers served by HAMA are characterised by high demand on the fast rotation of the products, large number of references and bar codes, and very efficient distribution to meet the requests of their customers.

The application for the warehouse management in real time, was developed by HAMA own IT department, with the objective to ensure full traceability from the production up till the delivery.

Equipped with a pistol grip, Gotive H42 is an ideal mobile device for this task thanks to its design, connectivity and battery life.

Country/geographical area: Spain

HAMA is the leading European designer, producer and distributor of electronic accessories for the consumer, IT, HiFi and communications markets, and all the emerging electronic industry, that needs accessories to improve or widen their products' functionality.
