

Multi Docking Stations

Gotive H41 Multi DS

multiple charging option

Multi Functional

- charges several devices at once (available with 4 or 10 mounting points for Gotive DS/SDS charging cradles)
- allows USB communication via individual DS/SDS cradles

Friendly Workspace Management

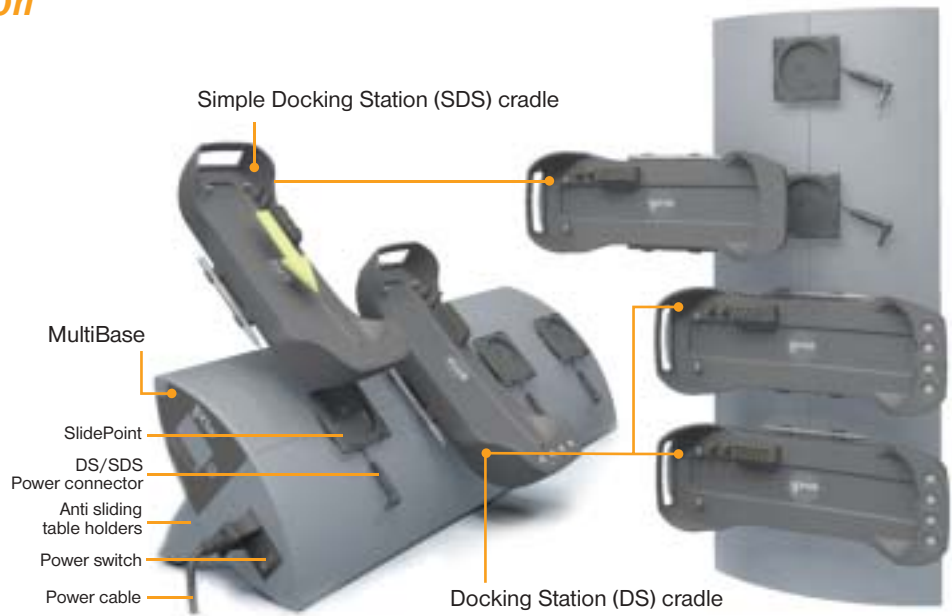

- can be mounted horizontally or vertically to walls, shelves, warehouse constructions
- can be placed on desks, shelves, racks
- takes noticeably less place than the same number of desktop docking stations
- occupies only 1 power socket (compared to 4 or 10 sockets for individual docking stations)

Easily Controlable

- helps to organise the devices and assign them to employees
- easy to see if a device is missing
- difficult for the panel to be relocated or stolen

Durable Construction

- solid aluminium extrusion surface

The concept of Gotive Multi Docking Stations adds organisational value to Gotive charging option and USB communication, combined with distinctive approach to space and surveillance issues.

Charging by docking

Gotive Multi Docking Station automatically charges Gotive communicators docked in the cradles. During the USB communication, communicators are using power from the socket in order to save their own batteries on-board.

Organise your working tools

Gotive handheld communicators have been designed to be working tools of your mobile workers. They need to have their space, too... for being recharged, data unloaded/ uploaded, assigned to a new worker, or the same person as yesterday. The panel of the MultiBase can be easily turned into a sign system by applying simple organisational elements, like for example name-plates, numbers, or colours.

Space-friendly charging solution

Employ Multi Docking Station anytime you need to save space around you. First of all the MultiBase with cradles take less place then the appropriate number of individual Docking Stations. Secondly, the MultiBase can be mounted virtually anywhere, be it vertically or horizontally, facing any direction, or it can be securely placed on a shelf or desk thanks to anti-sliding table holders. And above all, any of the MultiBases - with 4 or 10 mounting points for Gotive cradles has only one power cable and thus needs only one power socket for charging all devices in it. So no more cable bundles or separate cables winding around in your office or warehouse, and no more fights for a free power socket.

Physical Characteristics

MultiBase 4

Dimensions Length: 540mm; Width: 214mm; Height: 80 mm
(Length: 211 in; Width: 8.4 in; Height: 3.1 in)

Weight 4.5 kg

MultiBase 10

Dimensions Length: 1320mm; Width: 214mm; Height: 80 mm
(Length: 519 in; Width: 8.4 in; Height: 3.1 in)

Weight 10.8 kg

SlidePoints to slide-in DS/SDS onto MultiBase, 4 or 10 pcs

Power

Input Universal Input 85-264 VAC, 50/60 Hz
Internal power supply MultiBase 4: 75 W, MultiBase 10: 150 W
Output 4/10 x 12 VDC, 1.3 A max.
Power cable EUR

Data Communication

USB B via DS/SDS Client
